

## Aqara LED Strip T1 – FAQ

### Can the Aqara LED Strip T1 be connected directly to a mobile phone?

The Aqara LED Strip T1 cannot be connected directly to a mobile phone. An Aqara Zigbee 3.0 Hub is required. Please connect the Aqara Hub to the mobile phone first, then connect the Aqara LED Strip T1 to the hub.

Supported Hubs (Firmware: 4.0.2):

- Hub E1
- Hub M2
- Hub M3
- Camera Hub G3
- Camera Hub G2H Pro

### Can the Aqara LED Strip T1 be extended, and what is the maximum length it can reach?

The Aqara LED Strip T1 can be extended up to 10 metres, including an 8-metre extension on the 2-metre base.

### Can the Aqara LED Strip T1 be cut?

Yes, the Aqara LED Strip T1 is segmented every 20 cm and should only be cut at the marked cutting lines between each segment. The cut-off section cannot be reused. Ensure the power is turned off before making any cuts.

### How do I reset the LED Strip T1 after connecting it to the network?

Press and hold the on/off button on the controller for 5 seconds to reset the LED Strip T1.

### How do I install and secure the LED Strip T1?

Use the built-in 3M adhesive for installation. Ensure the surface is flat and dry before attaching the strip.

### Why isn't the extension part of the LED Strip T1 lighting up after connection?

Set the "Actual Length" of the LED Strip in the app's "Function Setting." Once saved, the extended strip should function normally.

### Does the Tunable White mode of the Aqara LED Strip T1 support segment control?

No, only RGB mode supports segment control.

### What are the functions of the buttons on the controller?

- On/Off: Controls the strip; long press to reset the device.
- Light Mode Switch: Toggles between light modes.
- Music Sync: Activates or switches the music sync effect.
- Microphone: Captures sound for the music sync mode.

### What is the effective range of the music sync mode?

The built-in microphone on the controller captures music, voices, and other sounds within a certain range. If the sound source is too distant or the volume too low, the microphone may not pick up the sound. For optimal performance, place the sound source as close to the controller as possible.

### Can the Aqara LED Strip T1 be used without connecting to the network?

Basic functions are available offline. However, advanced features, such as adjusting colour temperature, colour, and dynamic effects, require a connection to the Aqara Home or Apple Home app.

### Is the Aqara LED Strip T1 waterproof?

The Aqara LED Strip T1 has an IP44 rating, which means it is protected against dust and can be used outdoors. However, this applies only to the LED strip itself. The manual controller and power supply are not weatherproof and should be installed indoors.
